

Chemically strengthened specialty glass

# Dragontrail™

**Dragontrail is a glass material for high-quality cover glass used for screens on electronic devices such as smartphones, tablet PCs, TVs and similar devices.**

Chemically strengthened Dragontrail is six times stronger than conventional soda-lime glass, highly resistant to scratches and features a beautiful, pristine finish compared with resin.

## Features

- Large-size available (1500mm × 1850mm)
- 3D forming

## Data (Compered to clear float glass)

	Clear float glass	Dragontrail™
Max compressive Strength (MPa)	max 150	>600
Compressive Marginal Stress(MPa)	80	260
Vickers Hardness Hardness	527	>600
